WILTON SA

Over the past decade, our mines contributed over \$270 billion to Australia's GDP.

It's more than just numbers – it's the roads our cities and regions travel, the schools that shape Australia's future, and the hospitals that saves lives. Every Australian benefits from the hard work of Isaac's communities. To keep delivering for the nation, we need the Federal Government's support now more than ever.

S103.5 MILLION PER YEAR FOR FIVE YEARS Isaac is Queensland's largest resource

OVERALL COSTS

region with a growing renewable energy sector and a strong agricultural presence.

That's why we deserve fit-forpurpose road infrastructure that supports heavy industries and, more importantly, ensures the safety of our workers and communities.

Many roads across our region were never built to handle the sheer number, size, and weight of the vehicles they are now seeing. There are sections of roads that are in a critical state and need urgent attention to become fit for purpose.

While we allocate 60% of our Council budget to road repairs, it is not enough to maintain all our roads, which is why we need more funding.
